

Area Commission on Transportation (ACT)

Area Commissions on Transportation are advisory bodies chartered by the Oregon Transportation Commission (OTC).

ACTs address all aspects of transportation (surface, marine, air, and transportation safety) with primary focus on the state transportation system.

ACTs consider regional and local transportation issues if they affect the state system. They work with other local organizations dealing with transportation-related issues.

ACTs play a key advisory role in the development of the [Statewide Transportation Improvement Program](#) (STIP), which schedules funded transportation projects. ACTs establish a public process for area project selection priorities for the STIP. Through that process and following adopted project eligibility criteria, they prioritize transportation problems and solutions and recommend projects in their area to be included in the STIP.
