

State Funded Local Projects (SFLP)

An alternate option for Federal-aid local project delivery in Oregon

Overview

State Funded Local Projects (SFLP) is a new process for the 2015-18 STIP to provide state funds for federal projects selected under ODOT or Transportation Management Area (TMA) funding programs.

Eligible Projects are those selected through All Roads Transportation Safety (ARTS), Enhance, Local Bridge, and Active Transportation Discretionary. A portion of Surface Transportation Program Urban (STP-U) and Transportation Alternatives Program (TAP) funds are also eligible for state funding.

All local agencies are eligible for state funding, subject to certain limitations. Agencies *outside* of TMAs can state fund projects up to \$5 million in total cost. Agencies *inside* TMAs can state fund projects up to \$1 million in total cost.

Federal-aid projects not eligible for state funding must be delivered as federal projects by either a certified agency or by ODOT.

SFLP is similar to the current STP Fund Exchange process in that ODOT provides 94 cents on the dollar up to the state share of project costs.

SFLP is different from the current STP Fund Exchange in that:

1. State funding is provided to a specific project selected through ODOT or TMA processes instead of a general allocation to agencies
2. State funds are spent first, followed by local agency funds if needed
3. Local agencies must complete a Final Inspection Form with their LAL at project closeout, plus:
 - ARTS Projects: Final Cost and As-Constructed Drawings
 - Bridge Projects: Same as ARTS plus Structural Analysis Information, Foundation Report, Hydraulic Report including Scour Analysis, Pile Records, and Final Load Rating

SFLP does not change or replace the current STP Fund Exchange.

East Fork Silvies River Bridge, Harney County

Bridge replacement project selected for state funding
